Windsor Park & Golf Club

Windsor Park is set in a large park land on the outskirts of Bangkok. The course features mature tree lined fairways, many green side bunkers, sweeping creeks and ponds, and sloping greens. The first 27 holes consisting of Courses A, B, and C all opened the same time and share similar design characteristics. All aspects including design, challenge, beauty, and playing conditions are in perfect harmony making Windsor golf a perfect course for all players.

Suwan Golf & Country Club

Suwan Golf and Country Club is a new course is just less than an hour drive from Bangkok. Surrounding fruit orchards and rice fields along with the golf course's hilly and challenging layout makes every hole have its own unique character. Several holes require long and straight tee shots when played from the back tees so as to take the strategically placed fairway hazards out of play. The tips play at over 7100 yards! Water or OB comes come in to play on most holes, putting shot making accuracy at a premium.

Subhapruek Golf Course

The fairways at Subhapruek are lined with palm trees and water comes into play on almost every hole. A shorter, controlled game will generally prevail over a long, errant one. From the white tees, the par fours are generally short and can offer some good scoring opportunities. Although the par three's are short, they are all over water and very tricky - mastering them will be the secret to a good score.
